

## Your 2024 Western Health Advantage 3-Tier Preferred Drug List (PDL)

Effective Dec. 1, 2024

**For the most current list of covered medications or if you have questions:**

Call Member Services:

- **1-916-563-2250** or **1-888-563-2250**, toll free
- TDD/TTY, **1-888-877-5378**

Visit **optumrx.com** to:

- Find a participating retail pharmacy by ZIP code.
- Look up possible lower-cost medication alternatives.
- Compare medication pricing and options.
- Find an electronic copy of the formulary.
- Get plan coverage information.

This PDL includes a list of medications covered by Western Health Advantage (WHA). This list is updated at least monthly and is subject to change. All previous versions are no longer in effect.

### Health plan products:

# Understanding your PDL

## What if I have questions about my prescription drug benefit?

You can contact Member Services at the phone number listed on your Western Health Advantage (WHA) ID card or located on the cover of this booklet. Member Services can help you with these and other questions:

- Submitting prior authorization and step therapy exception requests
- Providing your cost share amount under your pharmacy benefit for drugs subject to a copayment or coinsurance
- Answering questions about medications that may be a part of your medical benefit, or you can also contact your doctor for more information.

## What is a PDL?

A PDL is a list of prescribed medications chosen by your plan for their safety, cost, and effectiveness. Medications are listed by categories or classes and are placed into cost levels known as tiers. It includes both brand and generic prescription medications approved by the U.S. Food and Drug Administration (FDA). The drug list in this PDL is organized by the American Hospital Formulary Service (AHFS) Pharmacologic-Therapeutic Classification system.

Western Health Advantage is guided by the Pharmacy and Therapeutics Committee (a group of doctors, nurses, and pharmacists) who reviews which medications will be covered, how well the drugs work, and overall value. They also make sure there are safe and covered options.

## How do I use my PDL?

You and your doctor can use the PDL to help you choose the most cost-effective prescription medications. This PDL booklet tells you if a medication is generic or brand, and if special rules apply. Bring this PDL with you when you see your doctor or use the website link located on the cover page. If your medication is not listed here, please visit the plan website or call the number on your member ID card.

## About this PDL

Where differences between this PDL and your benefit plan exist, the benefit plan documents rule. This may not be a complete list of medications that are covered by your plan. Please review your benefit plan for full details. The presence of a prescription medication on the PDL does not guarantee an enrollee will be prescribed that drug by a provider for a particular medical condition.

You can find out if your medication is listed in the PDL and if it is covered by the plan by using the alphabetical index by its brand or generic name, or by using the Category list.

The index at the end of the PDL lists the names of drugs by both generic and brand name, in alphabetical order. Once you find the drug name, go to the page number listed to locate the coverage information.

**Category List:** Drugs are grouped into AHFS therapeutic categories, which are listed under the Table of Contents in the PDL. If you know what category your medication is in, refer to the Table of Contents to find the page.

If a generic equivalent for a brand name is not available on the market, the generic drug will not be listed separately. The presence of a drug on the PDL does not guarantee that your doctor will prescribe the drug for a particular medical condition.

## What are tiers?

Tiers are the different cost levels you pay for a medication. Each tier is assigned a cost, set by your employer or plan sponsor. This is how much you will pay when you fill a prescription.

## Understanding your PDL continued

### When does the PDL change?

- WHA will update the printed PDL formulary with changes on a monthly basis. All previous versions are no longer in effect.
- Medications may move to a lower tier at any time.
- Medications may move to a higher tier when a generic equal becomes available.
- Medications may move to a higher tier or be excluded from coverage immediately if new information about drug safety or effectiveness is released or if the drug is removed from the market.

When a medication changes tiers, you may have to pay a different amount for that medication if:

- We add prior authorization, quantity limits and/or step therapy requirements.
- The medication moves to a higher tier.

Please note: We will notify you 60 days before the negative change becomes effective if you currently take the medication or at the time you request a refill (you will receive a 30-day supply). This notice will include (A) change in drug or dosage form; (B) changes in tier placement of a drug that results in an increase in cost sharing; and (C) any changes of utilization management restrictions, including any additions of these restrictions.

### Why are some medications excluded from coverage?

A medication may be excluded from coverage under your pharmacy benefit when it works the same as or similar to another prescription or over-the-counter (OTC) medication.

### What if I don't agree with a decision about an excluded medication?

You or your authorized representative and your doctor can ask for a coverage request by calling the number on your member ID card. WHA member services representatives can help guide you further.

### What is the copay amount for oral anti-cancer drugs?

Oral anti-cancer drugs are subject to a maximum copayment for each 1-month supply, after any deductible has been met.

# Medication tips

## What is the difference between brand-name and generic medications?

You can contact Member Services at the phone number listed on your WHA ID card or located on the cover of this booklet. Member Services can help you with these and other questions:

## What if my doctor writes a brand-name prescription?

If your doctor gives you a prescription for a brand-name medication, ask if a generic or lower-cost option could be right for you. Generic medications are usually your lowest-cost option.

## What are my pharmacy options for filling a prescription?

WHA uses the Optum Rx pharmacy network, which allows you to fill your prescription at one of the participating retail pharmacies. This includes most U.S. chain pharmacies and many independent pharmacies. To find a participating pharmacy near you, visit [mywha.org](http://mywha.org) and select pharmacy, or call WHA at the number on your member ID card or listed on the front cover of this booklet.

## Can I use a mail order pharmacy?

For certain types of medications, you can save time and money by receiving a 90-day supply through Optum® Home Delivery or by using the Select90 program at Walgreens or CVS Pharmacy. The medications available through home delivery or Select90 are drugs that you may be taking on a regular basis for a chronic or long-term medical condition.

## Over-the-counter medications

An over-the-counter (OTC) medication may be the right treatment for some conditions. Talk to your doctor about OTC options. Even though OTC medications may not be covered by your pharmacy benefit, they may cost less than a prescription medication.

## What if I am taking a specialty medication?

Specialty medications are for rare or complex medical conditions. They are oral or injectable medications that can cost more than \$600 for a 30-day supply. Please note, not all specialty medications are listed in this PDL. Most specialty medications require PA for coverage and all are limited to up to a 30-day supply through WHA's exclusive specialty pharmacy network.

Optum® Specialty Pharmacy can provide most of your specialty medications along with helpful programs and services. Call Optum Specialty Pharmacy at **1-855-427-4682** and have your prescriptions delivered right to your home. You may also contact NorthBay healthcare, UC Davis onsite pharmacies, or St. Joseph's McAuley pharmacy of Dignity Health. WHA will allow up to 2 initial fills at local retail pharmacies to make sure you get started on your medications in a timely manner. All other fills will be limited to WHA's exclusive specialty network, unless otherwise restricted by the manufacturer or FDA. Please refer to your Copayment Summary for specific copayment amounts.

# Definitions

**Brand-name drug** is a drug that is marketed under a proprietary, trademark protected name. The brand name drug shall be listed in all CAPITAL letters.

**Coinsurance** is a percentage of the cost of a covered health care benefit that an enrollee pays after the enrollee has paid the deductible, if a deductible applies to the health care benefit, such as the prescription drug benefit.

**Copayment** is a fixed dollar amount that an enrollee pays for a covered health care benefit after the enrollee has paid the deductible, if a deductible applies to the health care benefit, such as the prescription drug benefit.

**Deductible** is the amount an enrollee pays for covered health care benefits before the enrollee's health plan begins payment for all or part of the cost of the health care benefit under the terms of the policy.

**Drug Tier** is a group of prescription drugs that corresponds to a specified cost sharing tier in the health plan's prescription drug coverage. The tier in which a prescription drug is placed determines the enrollee's portion of the cost for the drug.

**Enrollee** is a person enrolled in a health plan who is entitled to receive services from the plan. All references to enrollees in this formulary template shall also include subscribers as defined in this section below.

**Exception request** is a request for coverage of a prescription drug. If an enrollee, his or her designee, or prescribing health care provider submits an exception request for coverage of a prescription drug, the health plan must cover the prescription drug when the drug is determined to be medically necessary to treat the enrollee's condition.

**Exigent circumstances** are when an enrollee is suffering from a health condition that may seriously jeopardize the enrollee's life, health, or ability to regain maximum function, or when an enrollee is undergoing a current course of treatment using a nonformulary drug.

**Formulary** is the complete list of drugs preferred for use and eligible for coverage under a health plan product, and includes all drugs covered under the outpatient prescription drug benefit of the health plan product. Formulary is also known as a prescription drug list.

**Generic drug** is the same drug as its brand name equivalent in dosage, safety, strength, how it is taken, quality, performance, and intended use. A generic drug is listed in bold and italicized lowercase letters.

**Nonformulary drug** is a prescription drug that is not listed on the health plan's formulary.

**Out-of-pocket cost** are copayments, coinsurance, and the applicable deductible, plus all costs for health care services that are not covered by the health plan.

**Prescribing provider** is a health care provider authorized to write a prescription to treat a medical condition for a health plan enrollee.

**Prescription** is an oral, written, or electronic order by a prescribing provider for a specific enrollee that contains the name of the prescription drug, the quantity of the prescribed drug, the date of issue, the name and contact information of the prescribing provider, the signature of the prescribing provider if the prescription is in writing, and if requested by the enrollee, the medical condition or purpose for which the drug is being prescribed.

**Prescription drug** is a drug that is prescribed by the enrollee's prescribing provider and requires a prescription under applicable law.

**Prior Authorization** is a health plan's requirement that the enrollee or the enrollee's prescribing provider obtain the health plan's authorization for a prescription drug before the health plan will cover the drug. The health plan shall grant a prior authorization when it is medically necessary for the enrollee to obtain the drug.

**Step therapy** is a process specifying the sequence in which different prescription drugs for a given medical condition and medically appropriate for a particular patient are prescribed. The health plan may require the enrollee to try one or more drugs to treat the enrollee's medical condition before the health plan will cover a particular drug for the condition pursuant to a step therapy request. If the enrollee's prescribing provider submits a request for step therapy exception, the health plans shall make exceptions to step therapy when the criteria is met.

**Subscriber** means the person who is responsible for payment to a plan or whose employment or other status, except for family dependency, is the basis for eligibility for membership in the plan.

# Reading your formulary

The formulary gives you choices so you and your doctor can decide your best course of treatment. In this PDL, a drug is listed alphabetically by its brand and generic name in its therapeutic category and class to which it belongs.

The generic drug name for a brand name drug is included after the brand name in parenthesis. If a generic equal for a brand name is both available and covered, the generic drug will be listed separately from the brand name in all **bold** and *italicized lowercase* letters.

## Brand example:

sovaldi oral tablet 400 mg ( <i>sofosbuvir</i> )	3	PA; SP; QL (30 day supply per 1 fill)
--	---	---------------------------------------

If a generic drug is marketed under a proprietary, trademark-protected brand name, the brand name will be listed after the generic name in parentheses and regular typeface in all CAPITAL letters.

## Generic drug example:

<i>triamterene-hctz oral tablet 37.5-25 mg, 75-50 mg</i>	1	
--	---	--

## Generic drug marketed under a proprietary brand name example:

<i>levothyroxine sodium</i> (LEVOXYL) TABS	1	
--	---	--

## Tier information

Using lower tier or preferred medications can help you pay your lowest out-of-pocket cost. Your plan may have multiple or no tiers. Please note: If you have a high-deductible plan, the tier cost levels will apply once you meet your deductible.

Drug tier	Includes	Helpful tips
<b>Tier 1</b>	Preferred generic and certain preferred brand-name medications	Use tier 1 drugs for the lowest out-of-pocket costs.
<b>Tier 2</b>	Preferred brand name and certain non-preferred generic medications	Use tier 2 drugs instead of tier 3 to help reduce your out-of-pocket costs.
<b>Tier 3</b>	Non-preferred (generic or brand) medications	Many tier 3 drugs have lower-cost options in tier 1 or 2. Ask your doctor if they could work for you.
<b>SI</b>	Self-injectable medications	
<b>ED</b>	Erectile dysfunction medications	
<b>INF</b>	Infertility medications	
<b>OA</b>	Office administered medications	May be considered under the medical benefit of the enrollee's contract. Contact your doctor for more information and refer to your Evidence of Coverage (EOC) for coverage information and exceptions.

## Reading your formulary continued

### Drug list information

In this drug list, some medications are noted with letters next to them to help you see which ones may have coverage requirements or limits. Your benefit plan decides how these medications may be covered.

<b>AL</b>	<b>Age limit</b> – These medications may require prior authorization if your age does not fall within the drug manufacturer, Food and Drug Administration (FDA) or treatment guideline recommendations.
<b>AC</b>	<b>Anti-cancer</b> – These oral anti-cancer drugs are subject to a maximum copayment for up to each 30-day supply, after any deductible has been met (per California State Law). This amount is listed in your WHA Copayment Summary.
<b>PA</b>	<b>Prior authorization</b> – Your doctor is required to give Western Health Advantage more information to determine coverage.
<b>QL</b>	<b>Quantity limit</b> – Medication may be limited to a certain number of doses or other limit on the amount that will be covered. Your doctor must request PA approval from WHA for a higher quantity of the drug.
<b>ST</b>	<b>Step therapy</b> – Must try lower-cost medication(s) before a higher-cost medication can be covered.
<b>PV</b>	<b>Preventive health benefit</b> – Due to Health Care Reform this product may be available at zero copay through your pharmacy benefit.
<b>SP</b>	<b>Specialty medication</b> – May require PA, limited to 30-day supply. Up to 2 initial fills allowed at local retail pharmacies. Exceptions may be allowed when manufacturer or FDA limits supply to select specialty pharmacies only.
*	Copayments waived for this medication; any plan deductible still applies.
^	Copayments waived for this medication; <b>skip deductible</b> .

### How do I request a prior authorization?

If your medication requires prior authorization (PA), your doctor can fax a completed PA form (available at [westernhealth.com/provider](https://westernhealth.com/provider)) to Western Health Advantage at **1-916-568-5280**. Should you or your doctor need additional information on how to request PA, please call the number on your member ID card. Once your doctor's request is received, we will notify your doctor of our decision within 72 hours. If WHA fails to respond to a completed PA or step therapy exception request within 72 hours of receiving a non-urgent request and 24 hours of receiving a request based on exigent circumstances, the request is deemed approved, and the health insurer may not deny the request thereafter.

If your doctor believes that waiting 72 hours for a standard decision could be harmful to your health, your doctor can ask for a fast decision. This applies only to requests for medications that you have not already received. We must make expedited decisions within 24 hours after we get your doctor's supporting statement.

In some cases, our plan requires you to first try certain medications to treat your medical condition before we will cover another drug for that condition. This is called step therapy. The required first step medication or preferred drug is a proven, cost-effective medication. Unless an exception is made, one or more preferred medications must be tried before progressing to a drug that is subject to step therapy.

A request for an exception to a step therapy requirement may be submitted by your doctor in the same manner as a request for PA. If a request for step therapy exception is denied, you or your doctor may appeal the denial. The denial documents provide more information on the appeal rights and procedures.

## Reading your formulary continued

If you have already tried and failed the preferred drug(s), or if you are already taking a drug that is subject to step therapy when you are enrolled in your WHA plan, step therapy won't be required. Also, the medication will be approved for coverage when guidelines are met for being medically necessary.

If we approve your medication PA or step exception, the approval continues for the date range noted on the exception, which may be for a specified number of prescription fills and for a period up to a maximum of 1 year. To keep the exception in place, you must remain enrolled in our plan, your doctor must continue to prescribe your medication at the same dosage and frequency of use, and your drug must be safe for treating your condition.

### Are all contraceptives covered?

Contraceptive benefits include coverage for all FDA-approved prescription and OTC contraceptive methods at \$0 cost-share. If a therapeutic equivalent of a particular brand name drug or device exists, members must use the generic product to be eligible for \$0 cost share. Contraceptive devices (including IUDs) and implantable contraceptives are not covered under the pharmacy benefit. They are covered under the medical benefit as described in your Evidence of Coverage (EOC). Refer to your EOC and Copay Summary for coverage information and limitations.

### What blood glucose supplies are covered?

Specific brands of blood glucose testing strips, lancets, and insulin syringes are covered by your pharmacy plan. You will need a prescription to use the pharmacy benefit for covered items.

Other diabetes supplies, equipment, and services may be covered under your medical benefit. These include:

- blood glucose monitors
- insulin pumps and supplies
- ketone urine testing strips and
- insulin pen delivery systems

Please refer to your EOC and Copay Summary for coverage information specifics and exceptions.

### Are HIV medications covered?

All HIV medications are covered under your pharmacy benefit if filled at a retail or specialty pharmacy. If administered by a health care professional, medications are covered under the medical benefit.

WHA covers antiretroviral drugs that are medically necessary for the prevention of HIV at \$0 cost share if delivered by a network health care provider and filled through a network pharmacy. These items include pre- or postexposure prophylaxis (PrEP or PEP). If there is a therapeutic equivalent of a brand-name drug, only the generic product will be eligible for \$0 cost share. WHA also covers services for initial HIV PrEP and follow-up care as recommended by the USPSTF and the CDC. HIV testing is covered, even if it is unrelated to a primary diagnosis.

### Are COVID-19 Products Covered?

WHA members are covered for COVID-19 vaccines and prescription therapeutics at \$0 cost-share when obtained at a network pharmacy or at their primary care provider (PCP). WHA will reimburse the cost of up to eight (8) FDA-approved at-home COVID-19 test kits per month at a maximum reimbursement of \$12 per kit (including tax and shipping if applicable) when obtained at a network pharmacy. Standard cost-shares apply when filled at a pharmacy outside of Optum Rx's standard network. Claim reimbursement can be submitted through WHA Pharmacy partner Optum Rx at <https://optumrx.akamaized.net/content/dam/rxmember/pdfs/dmr-forms/Claim-Form-Commercial-PPO-And-Union.pdf>. All receipts dated on or after January 15, 2022 will be accepted. A printed claims form may also be submitted. WHA will also cover the cost of general COVID-19 testing. If you believe you have been exposed and want to get tested, contact your doctor.

## Nondiscrimination notice and access to communication services

Optum Rx and its family of affiliated Optum companies does not discriminate on the basis of race, color, national origin, age, disability, or sex in its health programs or activities.

We provide assistance free of charge to people with disabilities or whose primary language is not English. To request a document in another format such as large print or to get language assistance such as a qualified interpreter, please call the number located on the back of your member ID card, TTY 711. Representatives are available 24 hours a day, 7 days a week.

If you believe that we have failed to provide these services or discriminated in another way on the basis of race, color, national origin, age, disability, or sex, you can send a complaint to:

Optum Rx Civil Rights Coordinator  
11000 Optum Circle  
Eden Prairie, MN 55344

**1-800-562-6223, TTY 711**

**1-855-351-5495**

**Optum\_Civil\_Rights@Optum.com**

If you need help filing a complaint, please call the number located on the back of your member ID card, TTY **711**. Representatives are available 24 hours a day, 7 days a week. You can also file a complaint directly with the U.S. Dept. of Health and Human Services online, by phone, or by mail at <https://ocrportal.hhs.gov/ocr/portal/lobby.jsf>.

Complaint forms are available at  
<http://www.hhs.gov/ocr/office/file/index.html>

Toll-free **1-800-368-1019, 1-800-537-7697** (TDD)

U.S. Dept. of Health and Human Services
